In a world that is
constantly evolving, those
who learn continuously will
lead consistently.

About Us

Global Training Consortium delivers world-class education and training across key global industries, combining academic excellence with practical, industry-aligned learning.

Our portfolio spans International Business and English Language, alongside professional qualifications in IT & Cybersecurity, Leadership & Management, Agriculture & Renewable Energy, Engineering & Oil Exploration, and Nursing – ensuring our learners are equipped with skills that are both relevant and in demand.

We work with individuals, professionals, and organisations to unlock potential, enhance performance, and create meaningful career progression. Our flexible delivery models are designed to fit around modern lifestyles and business needs, enabling learning without compromise.

With a focus on real-world outcomes, global relevance, and long-term impact, Global Training Consortium is committed to transforming lives and shaping futures worldwide.

A true leader creates opportunities for others to learn, grow and succeed.

Who We Are

**Progress begins when
knowledge meets
courage and innovation
meets execution.**

Global Training Consortium comprises a network of highly qualified academics and industry professionals, holding PhD and Master's level qualifications, supported by substantial experience across business, industry and applied research.

Our team combines academic excellence with real-world expertise, enabling us to deliver solutions that are both intellectually rigorous and practically effective. With backgrounds spanning multiple sectors – including education, energy, technology, and management – we are uniquely positioned to support clients at every level.

We work with a diverse range of stakeholders, from individual learners and professionals to corporate organisations and government bodies, providing tailored support that meets both strategic and operational needs.

In addition to delivering high-quality training programmes, we offer specialist consultancy services, including:

- Academic planning and curriculum development
- Strategic advisory for oil and gas projects
- Consultancy in renewable energy, including eco and solar initiatives

Our mission is to leverage our collective expertise to serve global communities, drive sustainable development and support meaningful progress across industries.

Our Courses

The most successful organisations invest in people who never stop learning.

Our Industry-focused training for global careers

We offer a diverse portfolio of programmes designed to equip learners with in-demand skills across key global industries:

IT & Cyber Security

Protect systems, manage risks, and defend digital infrastructure in a rapidly evolving cyber landscape.

Leadership & Management

Develop the skills to lead teams, drive performance, and make strategic business decisions.

Engineering & Oil Exploration

Gain technical expertise to operate within the global energy and engineering sectors.

Nursing & Healthcare Training

Build the knowledge and practical skills required to deliver high-quality patient care.

Agriculture & Renewable Energy

Explore sustainable practices and modern solutions in food production and clean energy.

International Business & English Language

Prepare for global opportunities through business knowledge and professional communication skills.

IT &

Cyber Security

Innovation is not a choice in business, it is the pathway to relevance and longevity.

Learn to protect, defend, and secure digital systems
Our IT & Cyber Security programme is designed to equip learners with industry-relevant knowledge, practical skills and hands-on experience in safeguarding systems, networks and data in today's rapidly evolving digital landscape.

As cyber threats become increasingly sophisticated, organisations require professionals who can identify vulnerabilities, mitigate risks, and respond effectively to security incidents. This programme goes beyond theory, immersing learners in real-life scenarios, case studies, and simulated cyber environments, enabling them to apply their knowledge in situations that mirror real-world challenges.

You will gain expertise in key areas including:

- Network Security
- Ethical Hacking
- Risk Management
- Data Protection and Compliance

Through a combination of practical exercises, simulations and scenario-based learning, you will develop the confidence and capability to operate in high-pressure environments and protect critical digital infrastructure.

Upon completion, you will be well-prepared to pursue roles across a wide range of industries, equipped with the skills, insight and experience demanded by today's cyber security landscape.

Leadership & Management

This course equips you with the practical skills and knowledge to lead teams effectively, manage organisational challenges, and make strategic decisions in a fast-paced business environment.

Designed for both aspiring and current leaders, you will explore key areas such as leadership styles, team dynamics, communication, and performance management.

Through real-world insights, case studies, and scenario-based learning, you will develop the confidence and capability to inspire teams, drive performance, and achieve business goals.

Leadership is not position, but responsibility — guided by knowledge and integrity.

Engineering & Oil Exploration

Our Engineering & Oil Exploration programme is designed to equip learners with the technical knowledge, practical skills, and industry awareness required to succeed in the global energy and engineering sectors.

The course provides a strong foundation in key areas including drilling operations, petroleum geology, equipment handling and industry standard health and safety practices.

Learners will also gain insight into the full lifecycle of energy projects, from exploration and extraction to production and operational management.

**Progress begins
when knowledge
meets courage and
innovation meets
execution.**

→ **Powering industries**

→ **Driving global
energy solutions**

→ **Upskilling global
talent and the
workforce**

Nursing & Healthcare

Our Nursing & Healthcare programme is designed to prepare learners with the essential knowledge, practical skills, and professional values required to work in the healthcare sector.

Covering key areas such as patient care, clinical practices, health and safety, and communication, the programme equips individuals to provide high-quality care in a range of settings, including hospitals, clinics, and community environments.

Through a combination of theoretical learning, real-life scenarios and practical training, learners develop the confidence and competence needed to support patients effectively and contribute to the wellbeing of individuals and communities.

This programme opens pathways to a rewarding career dedicated to care, compassion and making a meaningful difference in people's lives.

Personal development is the engine behind professional excellence and leadership success.

International Business & English

Our International Business & English Language programme is designed to equip learners with the knowledge and skills required to thrive in today's interconnected world.

Continuous learning is the competitive advantage of the modern professional.

Global Business Knowledge

Global Business Knowledge

Gain a strong understanding of international markets, trade, and business strategies, enabling you to operate effectively across different economic and cultural environments.

Professional English Communication

Professional English Communication

Develop advanced English language skills focused on business contexts, including professional writing, presentations, and effective communication in global settings.

Global Competence & Confidence

Global Competence & Confidence

Build the confidence to engage, collaborate, and compete internationally, preparing you to interact with diverse stakeholders and succeed in a global business environment.

Agriculture & Renewable Energy

Our Agriculture & Renewable Energy programme is designed to equip learners with the knowledge and practical skills needed to support modern, sustainable agricultural practices on a global scale.

As nations increasingly prioritise environmental sustainability and food security, this course explores how innovative farming techniques can be integrated with renewable energy solutions to enhance productivity while reducing environmental impact.

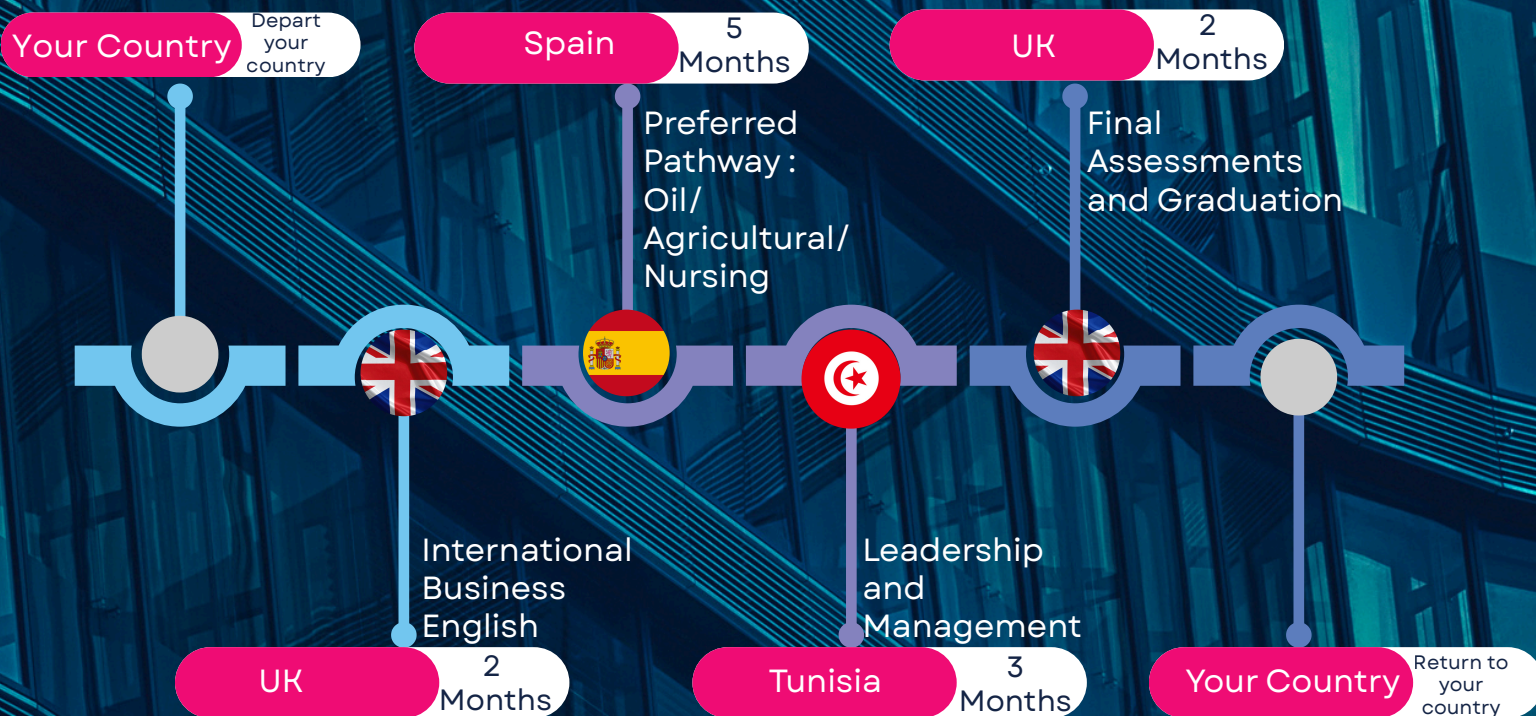

Learners will gain insight into key areas such as sustainable agriculture, resource management and renewable energy technologies, including solar-powered systems, biomass energy and eco-friendly farming methods. Through real-world examples and applied learning, you will understand how these solutions are being implemented across different regions worldwide.

This programme prepares you to contribute to global efforts in sustainable development, supporting both economic growth and ecological balance, and opening pathways in agriculture, environmental management and renewable energy sectors.

**Knowledge is the
foundation of
success; innovation is
the force that
transforms it into
progress.**

Develop your skills and knowledge with your chosen pathway

Option 1: Multi Country Route

- UK (2 Months)**
→ Study International Business English
- Spain (5 Months)**
→ Specialise in Oil & Gas/Agriculture/Eco Energy or Nursing
- Tunisia (2 Months)**
→ Develop skills in Leadership & Management
- UK (Final Stage)**
→ Graduation & Certification

**Option
2:
Single
Country**

**Study your preferred
pathway in Spain**

**A focused pathway delivered in
collaboration with our partner
institutes.**

Consultancy

When knowledge is combined with purpose, it becomes a force for transformation.

Global Training Consortium provides expert consultancy services to support the development and delivery of eco-friendly, sustainable, and high-impact projects across multiple sectors.

We work in partnership with businesses, institutions, and government bodies, offering strategic guidance from initial concept through to full implementation.

Our approach ensures that every project is not only environmentally responsible, but also commercially viable and scalable.

Our consultancy expertise includes:

- Project planning and feasibility analysis
- Strategic development and implementation
- Sustainable and renewable energy solutions
- Infrastructure and sector-specific advisory services
